## **“Video Camera Safe” © Subject Control**

An officer will put their hands on a suspect far more often than they will shoot. Ironically, we have mandatory shooting requirements and proficiency levels but no realistic requirements for empty hand subject control. Yet the unarmed sudden violent life and death assault is one of the officer's greatest fears. The A.L.E.A. subject control courses break all aggression down to its simplest form, requiring only gross motor and gross mental skills. Officers not only learn how to clear and escalate but how to control and handcuff when room does not allow for escape.

Once officers have attended the Basic, Intermediate and Advanced courses, they will have the knowledge to effectively evaluate, design and articulate a customized defensive tactics program to suit their individual department needs, instead of being force fed a generic boxed program. Officers will be taught how to handle aggression regardless of location or confined space (i.e. Car, Bus, Plane, Train).

The A.L.E.A. subject control courses emphasize "Non-Impact Oriented" (the concepts of close quarter striking are covered) forms of control, which can greatly reduce the injury to officers and subjects as well as liability for your department. The powerful A.L.E.A. principles of grappling work just as well at the lower end of the force continuum as at the top.
